

Fine care for fine cars

Waterless car cleaning was born in the roaring twenties, a time of fine living and fine automobiles. In those days, if you saw a perfectly polished Bentley or Rolls Royce, chances were good that it had been cleaned with Kozak Auto DryWash – a specially woven, deeply napped all-cotton cloth infused with the exclusive Kozak cleaning and polishing formula. Over the years, millions of automobile enthusiasts and professional detailers throughout the U.S. and Canada have sworn by the results they have achieved using the Kozak cloth.

How Auto DryWash works

The Kozak Auto DryWash cloth removes dirt particles by trapping them in the millions of compartments within the cloth's napped finish. Once the heavy dirt and dust are removed, it continues to polish the car's surface as it cleans and can even improve its finish with regular use. Use it any time of year on any type of finish, including waxed or clear-coated finishes.

Each cloth is guaranteed to clean the typical car at least 50 times, though it is not uncommon to get hundreds of cleanings from a single cloth, then use it many more times on wheels, rims and rocker panels.

Use Kozak Auto DryWash as a part of your complete car care program to clean, shine and extend the life of your car's finish. For best results, include a "water" wash for every fourth or fifth cleaning to remove road tar, bird droppings, bugs, tree sap, etc., and a proper wax job on a seasonal basis.

More great car-care products from LEXOL®

And for interior and exterior detailing of fine automobiles, use LEXOL's fine line of leather and vinyl care products:

LEXOL-pH® Cleaner deep cleans leather seats safely and thoroughly, without the harsh, damaging effects of alkaline soaps.

LEXOL Conditioner renews and restores the oils originally used in the tanning processes. Regular use of Lexol prevents cracking and extends the longevity of leather.

Vinylex Protectant cleans, protects and maintains interior and exterior vinyl, rubber and plastic surfaces.

The safe, easy way to
clean & shine your car
without water!

KOZAK® AUTO DRYWASH®

Used & tested by millions of enthusiasts since 1926

For best results

Follow these simple instructions:

1. Keep it dry

Kozak is designed to be used on dry surfaces only. Never wash the cloth – it would ruin the nap. Knock out excess dirt often by hitting the cloth against your hand.

2. Keep it folded

The cloth works best when folded as packaged. This padding makes for even pressure in use. Make wiping motions in straight sweeps.

3. Begin with a quick once-over

Use light strokes to get the heaviest dirt off first. Knock out excess dirt often, then refold the cloth to use a different surface, applying some pressure to polish.

4. Clean heavy dirt spots, bird droppings, etc. with a damp rag

Use a damp rag for hard-to-remove spots, then allow surface to dry before polishing with the Kozak cloth.

5. Store carefully for reuse

Knock out excess dirt, then refold the cloth back to its original shape, then place it in its convenient reclosable pouch.

Not recommended for use on glass.

Satisfied customers say:

“I have used Kozak for over 40 years and never found anything as good.”

– H. Hill, Toms River, New Jersey

“I haven’t washed my car in four months! I recommend it very highly.”

– M. Goldberg, Hollywood, Florida

“People ask me how I get my car so clean with no water. I tell them it is a superior American made product I’ve used for over 20 years.”

– Szanto Bruehler, Strasse, Austria

The Kozak cloth cleans and shines without water!

Its heavily napped fibers quickly remove dirt, dust and grime from your car's finish.

Hand-rubbing brings out the “showroom shine.”

Five reasons to use it

1. It saves time

Kozak Auto DryWash is the fast, easy way to shine and clean your car.

2. It saves money

One Kozak cloth is good for at least 50 cleanings. That's only pennies a wash!

3. It's completely safe

Kozak Auto DryWash will not harm your car's paint, wax or other finishes when used as directed. It will not scratch even the finest paint job, and it will not harm your hands. After using the cloth, use mild soap and water to clean your hands of dirt and dust, or wear gloves to avoid contact with dirt.

4. It saves water

You don't need water at all for a typical Kozak cleaning. (For hard-to-remove spots, a damp rag will do.)

5. It's scientifically tested

The Kozak cloth is made of selected long, cotton fibers, specially woven to a thick, plush nap and infused with an exclusive formula designed to safely remove dirt and dust from your car's finish. Best of all, it gets better with age: the cloth's deep nap becomes “meshed” with use; this naturally random pattern enhances its polishing power.

“I'm always receiving compliments on the beautiful shine on the car. It stands out much more than the average car. The Kozak is really great!”

– M. Nickell, Neodesha, Kansas
